Laboratorium 2

Zadanie 1

Kod

```
# Zad1
data, fs = sf.read('sound1.wav', dtype='float32')

newDataLeftChannel = data[:_0]
newDataRightChannel = data[:_1]
mono = (newDataLeftChannel + newDataRightChannel)/2

solverite('sound_L.wav'_newDataLeftChannel_fs)
sf.write('sound_R.wav'_newDataRightChannel_fs)
sf.write('sound_mix.wav'_newDataRightChannel_fs)
```

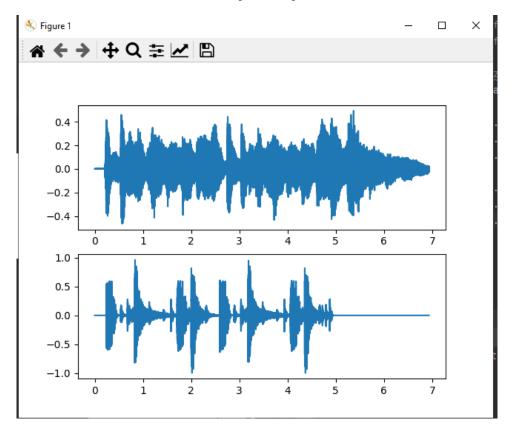

Część trzecia

Kod

```
data, fs = sf.read('sound1.wav', dtype='float32')
x = np.arange(0,data.shape[0])/fs
plt.figure()
plt.subplot(2,1,1)
plt.plot(x,data[:,0])

plt.subplot(2,1,2)
plt.plot(x,data[:,1])
plt.show()
```

Wykresy

Zadanie 2

Kod

```
plotAudio(Signal,Fs,TimeMargin=[0,0.02],fsize=2**8):
    x = np.arange(0,Signal.shape[0])/Fs

plt.figure()
    plt.subplot(2,1,1)
    plt.plot(x,Signal)
    plt.ylabel('Amplituda')
    plt.xlabel('Czas w sekundach')
    plt.xlim(TimeMargin[0],TimeMargin[1])

plt.subplot(2,1,2)
    yf = scipy.fftpack.fft(Signal, fsize)
    plt.plot(np.arange(0, Fs / 2, Fs / fsize), 20 * np.log10(np.abs(yf[:fsize // 2])))
    plt.ylabel('dB')
    plt.xlabel('Czestotliwości')
    plt.show()

data, fs = sf.read('sin_440Hz.wav', dtype=np.int32)
    plotAudio(data_fs,[0,1])
```
